

# Expanded Access Policy

AVM Biotechnology development resources are focused on conducting clinical studies required by regulatory authorities to fully answer important scientific questions about the potential risks and benefits of our investigational products, and to obtain regulatory approval.

AVM Biotechnology is committed to making investigational products available to seriously ill patients who have exhausted other treatment options. A treating physician, who is able to comply with the requirements that are stated in this document, may request information about how to apply for access to AVM Biotechnology's investigational products by contacting the Company.

The purpose of this policy is to describe the requirements for Expanded Access to AVM Biotechnology investigational products to patients outside of a clinical study.

## SCOPE

This policy applies to provision of access to an AVM Biotechnology investigational product that is not approved for any purpose in the country from which the request is intended to be used. This also includes the time period between regulatory approval of an investigational product and its commercial availability in a country.

## POLICY STATEMENTS

Any use of an AVM Biotechnology investigational product outside a clinical study in a country must be in accordance with local laws and regulations governing such programs, including AVM Biotechnology policies and procedures.

In general, where permitted by local regulation, the investigational product supplied via Expanded Access may no longer be provided by AVM Biotechnology when it becomes available via the local healthcare system. AVM Biotechnology may decide not to provide an investigational product under this policy if the Company does not intend to market the product in the country.

## **A Patient Eligibility Criteria**

To be eligible for access to an investigational product, patients must meet the following criteria:

- Suffer from a serious or immediately life-threatening disease or condition.
- Have undergone appropriate standard treatments without success and no comparable or satisfactory alternative treatment is available or exists to treat the disease or condition.
- Are ineligible for participation in any ongoing clinical study of the investigational product, which includes lack of access due to geographic limitations.
- The patient has a disease for which there is sufficient evidence of a projected benefit from the use of the investigational product and the benefit outweighs the known or anticipated risks.
- There is adequate information to support appropriate dosing for a special population of patients such as pediatric, elderly, renal or hepatic disease, etc.
- Any other pertinent medical criteria for access to the investigational product, as established by the AVM Biotechnology clinically or medically responsible individual.

## **B Investigational Product Criteria**

In addition to the patient eligibility requirements, the investigational product must meet the following criteria:

- The product is under investigation in one or more clinical studies.
- There is sufficient evidence to expect that the investigational product will have an acceptable safety profile for the intended patient population.
- The provision of the investigational product will not interfere with or compromise the clinical development of the product.

## **C Treating Physician Criteria and Responsibilities**

The physician(s) attending to the patient(s) who is/are receiving an investigational product through compassionate use access is (are) properly licensed and fully qualified to administer the product. The physician must agree in writing to comply with:

- Any applicable country-specific legal and regulatory requirements related to providing an investigational product under Expanded Access.
- Any AVM Biotechnology requirements in terms of medical criteria, reporting of patient outcomes, safety reporting, drug supply/use and protection of intellectual property. A treating physician may submit questions or requests regarding expanded access to AVM by calling **206-906-9922** or by e-mailing [\*\*compassionateuse@avmbiotech.com\*\*](mailto:compassionateuse@avmbiotech.com).
